

MATHEMATICS

GCSE RE-SIT

ST HILDA'S
COLLEGE

Compulsory for students who achieve below a grade 4 at GCSE

Course Content
<p>Duration of course: 1 Year</p> <p>GCSE Mathematics is a one-year revision programme designed to allow students who achieved below a grade 4 in Year 11 to improve their grade in this important academic subject. If you achieve below a grade 4 at GCSE you must attend this course.</p>
Teaching and Learning
<p>GCSE Mathematics re-sit lessons take place after college on a Wednesday.</p> <p>Teaching focuses on those areas that students found difficult in Y11, reinforces important concepts and makes extensive use of examination standard questions from an early stage. The limited time available for this programme means it is not possible to cover all of the material in the GCSE specification.</p> <p>Students will also have access to the 'My Maths' and 'Mathswatch' software packages within school and at home to provide additional support outside of class.</p> <p>Linear examinations are taken in May/June of Year 12.</p>
Assessment
<p>While GCSE Mathematics is not the first choice subject of many students in the Sixth Form, it is a very important qualification required by many employers and also for Higher Education.</p> <p>Students are expected to offer the same commitment to this programme as to any other Y12 subject. You are required to attend all lessons, submit all homework and prepare thoroughly for examinations at the appropriate time.</p> <p>GCSE Mathematics at grade 4 or above is a qualification required for the vast majority of Higher Education courses. It is nationally recognised alongside English Language as being an important qualification for many occupations.</p>
